

Want to use a Bluetooth earpiece on your X6100?

After logging into your device with the method you used, paste the text below into a nano session as follows:

```
[root@XIEGU-x6100:/root/bluetooth-hack]# sh install.sh
```

Then restart your radio.

After pairing and connecting a device you should hear sound within 10 seconds. Some devices don't work, but my Plantronics Bluetooth ear pieces worked fine. After each restart, you must activate the bluetooth device by pushing its button or such.

NOTE: The volume of the Bluetooth device is independent of the radio.
